

Swiss «Model worlds» at the Computerspiel Museum in Berlin

Posted by Pro Helvetia | May 22, 2013

Model worlds, a special exhibition shown at the **Computerspiel Museum in Berlin**, will show works of Swiss visual artist **Matthias Zimmermann**. His pictures directly deal with the question of the influence of games on the arts. His exploratory productions, mixing digital and analogue techniques, reflect the influence of modern landscapes on the artistic process. The vernissage takes place on May 22nd, 6pm in the presence of the artist.
